(Construction) Minutes

MAY 28 1

11. The World Trade Center - North and South Tower Buildings - Spray-On Fireproofing Contract WTC-113.00 - Supplement 1

It was recalled to the Committee that the Board, at its meeting on November 14, 1968 (appearing at pages 466-467 of the Official Minutes of that date), authorized the award of Contract WTC-113.00 - Spray-On Fireproofing, North and South Tower Buildings, The World Trade Center - to Mario & DiBono Plastering Company, Inc. at a price of $1,725,000, exclusive of an authorization of $80,000 for extra work. This contract requires spray-on fireproofing of the structural steel of The World Tr Center Tower Buildings, but does not include the protection of isolated core columns which occur as elevator banks terminate since it was planned that this would be done under the carpentry contract.

The original design of the Tower Buildings required that isolated core columns be fireproofed by the application of layers of gypsum plank and sheet rock. However, in negotiating the carpentry contract (WTC-110.00) with Star Circle Wall Systems, Inc., it was determined that spray-on fireproofing should be substituted for the wallboard construction and the work was not included in the carpentry cont

It is recommended that Supplement 1 to Contract WTC-113.00 be authorize the required spray-on fireproofing of the isolated core columns. The contractor quoted a price of $85,000 comprised of $40,000 for Sale and $45,000 for Work.

The Committee has power to act in this matter under the By-laws, Article Paragraph C-3.

Whereupon, the following resolution was unanimously adopted:
